

## Speed the Feed to Your Birds

*Your hen house should not be a waiting room.*

### Product Features

- The ULTRAFLO auger delivers feed fast – 100 feet (30.5 meters) per minute.
- A variety of grill spacings are available to prevent males from eating the hen's ration.
- Separate rooster feeder is available to keep the male in better condition ... and fertility high.

The Chore-Time ULTRAFLO® Breeder Feeding System reliably delivers a uniform feed ration to every breeder hen. Each bird gets its share of the ration with less stress for better uniformity. The feeder is easy to manage – no corner units or links to cause break-downs. And almost no feed is wasted which means lower operating cost. Let Chore-Time help you get the most eggs for your money with the proven ULTRAFLO feeder for breeder hens.

### Product Advantages

- Delivery speed means no birds can eat until all birds can eat – eliminates competition, stress, and picking over of feed.
- Auger flightings act as a grid to prevent raking and wasting feed.
- Trough shape provides a natural “feed catch” zone for even greater feed savings.
- The auger has a rotating action which stirs feed to maintain an absolute mix of feed components for a direct “bin-to-bird” feed ration.
- Low horsepower requirements save energy.
- System is easy to program and operate and requires virtually no maintenance.
