

Gets Chicks Off to a Good Start and Simplifies New Flock Chores

E-Z START® Chick Feeder

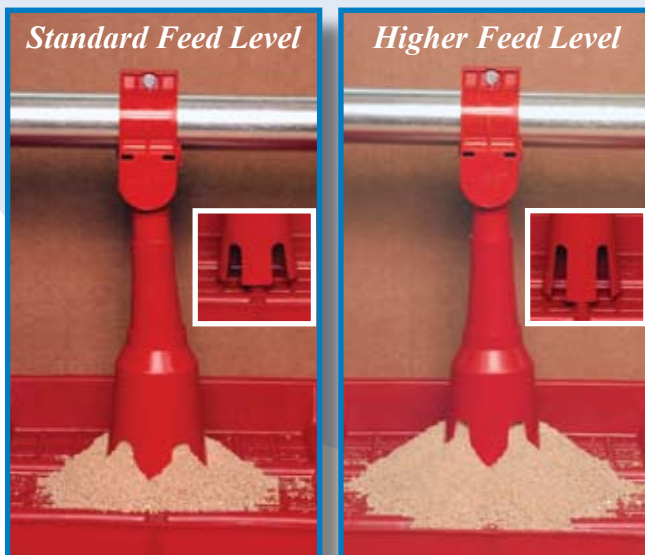

- Standard outlet drop is available separately (top right), with optional red brood cone (center right) or with optional telescoping white extension tube (bottom right).
- E-Z START® Brood Cone telescopes from 9 to 12 inches (23 to 30 cm) in height (from bottom of cone to center of feeder tube).
- E-Z START® Telescoping Extension Tube is available in 3.3-, 4.8- or 6-inch (84-, 122- and 152-mm) lengths to accommodate various feeder line heights.
- High level of feed in tray encourages perimeter eating, minimizes feed contamination and aids in chick transition to round pans.
- Durable, polypropylene plastic construction with ultraviolet protection for long life.
- Easy to operate, manage, clean and store. No tools required to adjust telescoping tubes.

Outlet drop tube swings and locks under feeder line with built-in feed shut-off.

Telescoping Brood Cone stores neatly under the feeder tube.

Brood cone comes with standard height slots (shown at left above) or trim away designated portion at top of slot for a higher feed level (shown at right above).

Telescoping white extension tube allows feeder adjustment to various pan heights.

Gets Poults Off to a Good Start and Simplifies New Flock Chores

E-Z START® Poult Feeder

- Standard outlet drop tube is available separately or with optional white telescoping tube in 3.3-, 4.8- or 6-inch (84-, 122- and 152-mm) lengths to accommodate various feeder line heights.
- Unique feed cone maintains proper feed level and features patented sparkle flecks to attract poults.
- High level of feed in pan encourages perimeter eating, minimizes feed contamination and aids in poult transition to round pans.
- Durable, polypropylene plastic construction with ultraviolet protection for long life.
- Easy to operate, manage, clean and store.

Low 2.5-inch (64 mm) pan height with deep "V" shape in bottom works together with feed cone to flow plenty of feed to bird eating area. Feed cone's patented sparkle flecks attract poults.

Permanently mounted outlet drop tube swings and locks under feeder line with built-in feed shut-off.
