

CHORE-TRONICS® Breeder Package

Let's grow together.

CHORE-TIME® Breeder Scale

- Specifically designed for pullet and breeder applications.
- Birds move across the scale on their own, reducing labor requirements and biosecurity risk of manual weighing.
- Scale features highly accurate hanging platforms. Anti-swing for slats protects birds.
- Control displays data such as expected weight, average weight, number of weights, growth, uniformity, weight histograms, etc.
- Dependable hardware technology and software algorithms and C-Central™ Software ready.

Up to eight scale inputs allows for multiple house connection. Each weighing platform can weigh birds in two different weight ranges (males and females).

See house diagram on reverse.

CHORE-TRONICS® Breeder Control includes extra capabilities especially for breeder production.

CHORE-TRONICS® Breeder Control

Includes all features of CHORE-TRONICS® 2 Standard Control, plus:

- Ability to turn on extra tunnel fans during and after feeding times.
- Ability to control egg storage room environment (heating, cooling and humidity).
- Separate filling and feeding clocks for male and female birds.
- Can deliver a pre-determined amount of feed from either a dump scale or a mechanical beam scale.
- Customizable feeding programs for every-other-day, 5-and-2, etc.
- Water clock with feeding day and non-feeding day schedules.
- Winch clock to lower male feeder.
- Expanded management screens to track egg data.
- Weekly summaries in history screens.
- Special lighting program for feeding time.
