

CHORE-TIME® Control Pan Light

Let's grow together.

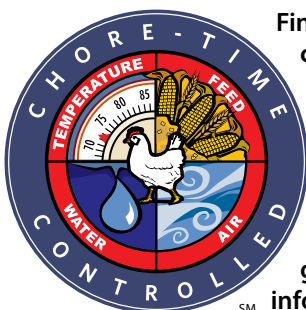

*Chore-Time's Control Pan Light
Attracts Birds to the Control Pan*

Chore-Time's Control Pan Light

Encourage your birds to eat from the feeder lines' control pans by using Chore-Time's Control Pan Light!

- Bright white light attracts birds to the control pan – more feed gets eaten from the control pan by increasing bird activity there.
- Helps to ensure that feed is delivered to the rest of the line by encouraging a higher rate of consumption at the control pan.
- 220 V AC light* is powered by the control pan's power unit and remains lit whenever the timer activates the feeder. Pan light remains lit 24 hours a day with ad lib feeding.
- The pan light is easy to retrofit and can be mounted on any 1.75-inch (44 mm) diameter feeder line tube with 220 V AC power supply.
- Rugged, 9-watt LED bulb does not build up heat and is rated for long life without the hassle of frequently replacing burned out bulbs.
- Light kit includes all components needed for installation.

*115 V AC model also available.
